WHERE: **Congregation Beth Emek**
3400 Nevada Court
Pleasanton, CA 94566

COST: **No Charge ~Visitors Welcome**

A One-Step Portal for Online Genealogy

Stephen Morse is the creator of the One-Step Website for which he has received both the Lifetime Achievement Award and the Outstanding Contribution Award from the International Association of Jewish Genealogical Societies, Award of Merit from the National Genealogical Society, first-ever Excellence Award from the Association of Professional Genealogists, and two awards that he cannot pronounce from Polish genealogical societies.

In his other life Morse is a computer professional with a doctorate degree in electrical engineering. He has held various research, development, and teaching positions, authored numerous technical papers, written four textbooks, and holds four patents. He is best known as the architect of the Intel 8086 (the granddaddy of today's Pentium processor), which sparked the PC revolution more than 35 years ago.

This lecture will cover his One-Step Portal for Online Genealogy, which has had many enhancements since his last L-AGS presentation of this topic. Please review his One-Step website prior to this meeting so you can better appreciate all that he has accomplished to help genealogy researchers around the world and learn of the many awards he has received, http://www.stephenmorse.org/.

For additional information contact: Kay Speaks, L-AGS Program Chair, email: program@L-AGS.org
Refreshments following the presentation.
