From Scotland to the American Frontier Following & Understanding the Migrations of the Scots-Irish

The Scots-Irish represent one of the largest and most interesting groups of American immigrants. Their journey from Scotland to the American frontier consisted of three distinct movements:

- From Scotland to the Irish province of Ulster (17th Century)
- From Ulster to America (18th Century)
- Fanning out to America's frontier (19th Century)

This presentation will discuss the background, reasons, and challenges that were inherent in each of these migration waves. A special emphasis will be placed on the cultural, political, social, and religious influences that shaped their decisions and movements.

Scott Norrick's passion is connecting people to their past. With an undergraduate degree from the University of Illinois and a master's degree from Northwestern University, he combines over 30 years of family history research with the necessary skills and passion to provide meaningful and proven results. Having traced and documented thousands of ancestors and relatives in both the US and Northern Europe, he is experienced with all the latest and time-tested genealogical tools and resources. In addition to helping clients with their genealogical research, he has presented to dozens of genealogical societies, historical societies, and libraries. He also recently presented to the Association of Professional Genealogists.
